PROFESSIONAL SUMMARY

Aspiring Data Scientist and Technology Professional currently pursuing a Bachelor's degree in Data Science at Uganda Christian University, expected to graduate in **2028**. Passionate about transforming data into actionable insights and building scalable technology solutions that solve real-world challenges. Experienced in data visualization, structured networking, system design, and decision support systems, with hands-on exposure to Power BI, Cisco networking, Linux systems, and engineering workflows. Strong interest in finance analytics, network infrastructure, and intelligent systems.

EDUCATION

Uganda Christian University

Bachelor of Science in Data Science

Expected Graduation: 2028

Relevant Coursework:

Data Analysis

Database Systems

Computer Networks

Machine Learning

Decision Support Systems

Business Intelligence

Programming Fundamentals

TECHNICAL SKILLS

Data Science & Analytics

Python

Power BI

Microsoft Excel

Data Cleaning

Data Visualization

Statistical Analysis

DAX

Power Query

Networking & Infrastructure

VLAN Configuration

Inter-VLAN Routing

Router-on-a-Stick

DHCP Configuration

OSPF Dynamic Routing

Structured Cabling

Patch Panel Configuration

Cisco Packet Tracer

Switch Configuration

SSH Remote Access

Network Security ACLs

Systems & Tools

Linux Administration

Samba File Sharing

GitHub

SolidWorks

HTML

CSS

LaTeX

Draw.io

PROJECTS

Enterprise Multi-Site Network Architecture Design

Designed and implemented a scalable enterprise network topology using Cisco Packet Tracer based on the three-tier architecture model (Core, Distribution, Access). Configured VLAN segmentation, trunking, inter-VLAN routing, SSH access, management VLANs, OSPF routing, and WAN connectivity across multiple branch sites.

Key Achievements:

- Designed logical and physical topology for 8 interconnected racks
- Configured secure remote management using SSH
- Implemented VLAN segmentation for students and staff
- Applied ACL policies for traffic control
- Built fault-tolerant and scalable routing model

Kilimo Hub Agricultural Information System

Collaborated in designing and pitching **Kilimo Hub**, a digital agricultural platform aimed at empowering farmers through information accessibility, market insights, and knowledge-sharing systems.

Key Contributions:

- Problem analysis
- System design support
- Pitch development
- Revenue model contribution
- Growth strategy design

Community Sanitation Decision Support System

Analyzed sanitation challenges in a local community and evaluated potential solutions using decision-support methodologies.

Key Contributions:

- Problem modeling
- Alternative evaluation
- Risk assessment
- Solution recommendation

Business Intelligence Dashboard Development

Developed Power BI dashboards from raw Excel datasets by transforming, modeling, and visualizing business data into interactive insights.

Key Skills Applied:

- Data cleaning
- Star schema modeling
- Dashboard creation
- KPI tracking
- Slicer integration

PRACTICAL EXPERIENCE

Networking Practical Labs

Uganda Christian University

- Terminated Ethernet cables following T568B standards
- Configured patch panels and rack infrastructure
- Established PC-to-PC communication
- Implemented Linux-to-Windows file sharing using Samba
- Performed live file streaming across structured networks
- Configured Cisco switches and routers
- Designed and tested ring and hub-and-spoke network topologies

SolidWorks Engineering Labs

- Designed 3D engineering models
- Created part assemblies
- Generated technical drawings
- Worked with engineering dimensions and constraints
- Learned parametric modeling principles

ARTICLES & PUBLICATIONS

- Structured Cabling and File Streaming in Linux Networks
- Pitching Kilimo Hub: Building Agricultural Information Systems
- Enterprise Network Design and VLAN Segmentation
- Power BI for Business Intelligence and Visualization

Published on **Medium** and shared via **LinkedIn**

LANGUAGES

English — Fluent

Luganda — Fluent

Madi — Fluent

French — Basic (Actively Learning)

LEADERSHIP & COLLABORATION

- Strong teamwork and collaboration in technical group projects
- Presentation and pitching experience
- Problem-solving under project deadlines
- Technical documentation and reporting
- Ability to adapt quickly to new technologies

CAREER INTERESTS

Data Science in Finance

Business Intelligence

Network Engineering

Cloud Infrastructure

Cybersecurity

AI Applications in Agriculture
